

NEPHMADNESS 2017

Glomerulonephritis

- Protocol Biopsy in Lupus
- Steroids for IgA
- Anti-PLA2r in Membranous
- Rituximab for Minimal Change

History

- History of the Dipstick U/A
- History of the Kidney Biopsy
- History of Hemodialysis
- History of Kidney Transplant

Dialysis

- Kt/V Urea
- Depression in Dialysis
- Neurocognitive Declines in HD
- Patient Reported Outcomes

Biomedical Research

- Gene Microarray
- Two Photon Microscopy
- CRISPR-Cas9
- Single Cell RNA Sequencing

- ◆ Entries must be registered by March 24
- ◆ Individuals and programs can enter
- ◆ AJKDblog.org to register
- ◆ Free
- ◆ Prizes

Disparities

- Genes in ESKD Disparity
- Society in ESKD Disparity
- Patient Factors in Transplant Disparity
- System Factors in Transplant Disparity

Genetics

- Podocytopathies
- Ciliopathies
- Drosophila
- Zebrafish

Diabetes

- ACEi and ARB in DN
- Glycemic Control in DN
- SGLT2 Inhibitors in DN
- GLP1 Agonists in DN

Nutrition

- Protein Restriction in CKD
- Feeding During Dialysis
- Microbiome and the Kidney
- Omega 3 Fatty Acids in CKD
